PHILIPPINE STARTUP CHALLENGE XI

JUMI

Explainable, two-sided job matching for Filipino jobseekers and employers.

Presented by **Priori++**

Applicants and vacancies still miss each other

1.72M

applicants

PSA 2023-2024 ISLE

455,593

vacancies recorded

same survey

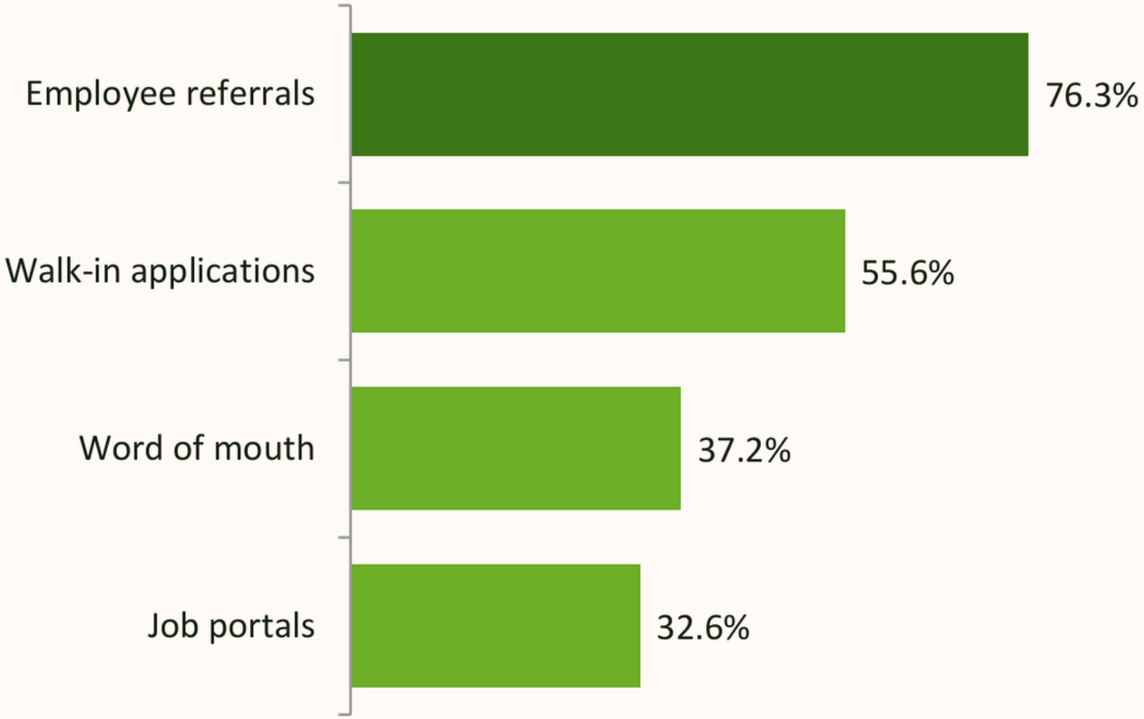

34.2%

of vacancies were hard to fill, more than 1 in 3

About four applicants compete for each vacancy, yet hiring stays difficult. The gap is in discovery and information, not only in headcount.

Philippine Statistics Authority (PSA), 2023–2024 Integrated Survey on Labor and Employment (ISLE)

Hiring runs on networks; newcomers get left out

43.0%

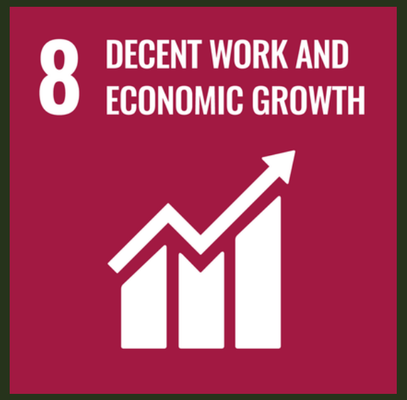

of unemployed Filipinos are aged 15–24, who are only 13.9% of the labor force

Screening favors experience. Entry-level talent has internships, projects and portfolios that go unseen.

Employers can't see fit. Salary, location and skills gaps stay hidden, so negotiable and non-negotiable differences blur.

Philippine Statistics Authority (PSA), 2023–2024 and 2026 Integrated Survey on Labor and Employment (ISLE)

SDG priority: decent work and fewer inequalities

Targets 8.5 and 8.6

Jumi broadens access to relevant employment opportunities for young jobseekers.

Target 10.2

Projects, internships, certifications and portfolios give applicants more ways to demonstrate competence.

Target market: early-career talent and employers

Jobseekers

Graduating students, fresh graduates, entry-level and early-career professionals who want relevant openings and a way to show skills beyond work experience.

Employers

Businesses, HR teams, hiring managers and recruiters filling entry-level or junior roles, from a single recruiter to multi-recruiter organizations.

Secondary beneficiaries

Universities and career offices
A new route to employers for their graduates

Workforce and policy bodies
Later: anonymized insights on recurring hiring gaps

Business model: free core, premium on both sides

Free core

For jobseekers and employers alike, so the network can grow.

- ✓ Profiles and recommendations
- ✓ Compatibility explanations
- ✓ Limited daily swipes
- ✓ Mutual matching and messaging

Jobseeker Pro

More swipes, advanced filters, visibility boosts and detailed match feedback.

Employer Pro

More candidate discovery, advanced filters, interested-candidate visibility and analytics.

Organization

Multiple recruiter seats, shared vacancies, permissions and team reporting.

One-time boosts

Swipe packs and temporary profile or vacancy visibility boosts.

Solution: matches both sides can understand

Jumi recommends vacancies to jobseekers and candidates to employers, explains why each match may work, and opens a private chat only when interest is mutual.

1

Create profiles

Jobseekers: skills and preferences. Employers: requirements, pay, location, work setup.

2

Assess compatibility

Skills, experience, compensation, location and work arrangement, scored together.

3

Review explanations

A factor-level breakdown shows why a match may or may not work.

4

Express interest

Each side swipes independently. No one is pushed to apply.

5

Unlock messaging

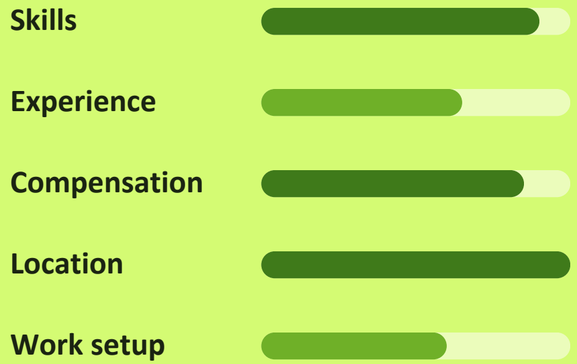

A mutual match opens private chat for interviews and next steps.

Jumi facilitates the connection. Applicants decide whether to pursue a role; employers keep every hiring decision.

Features: five things that set Jumi apart

Explainable matching

An overall score plus a factor-level view, so mismatches are visible instead of hidden behind a yes or no.

Two-sided discovery

Vacancies for jobseekers, candidates for employers.

Flexible evidence

Projects, internships, certifications and portfolios count.

Required vs preferred

Essentials stay visible without hiding potential.

Mutual-interest messaging

Chat opens only after both sides opt in.

Product preview: how a match feels in the app

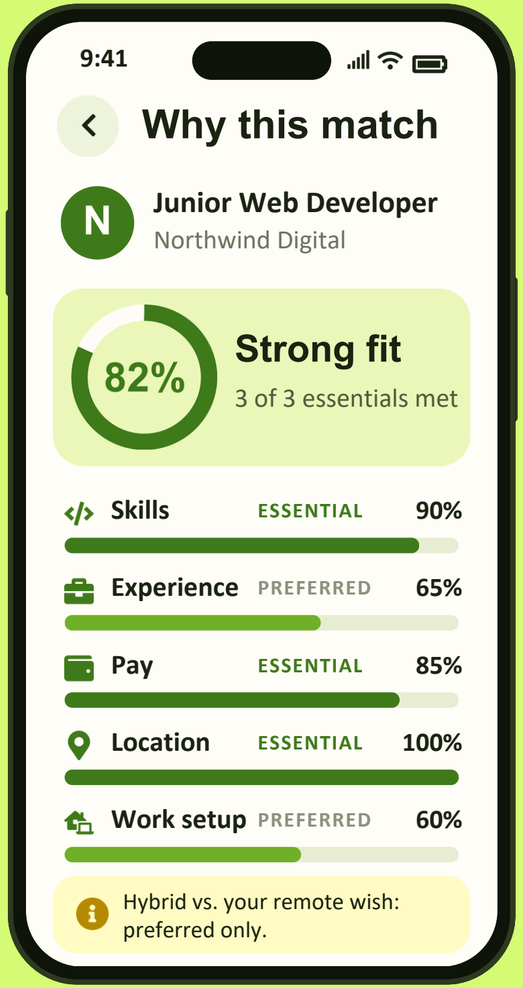

A swipe-style experience, inspired by apps like Bumble, with the hiring detail those apps don't show.

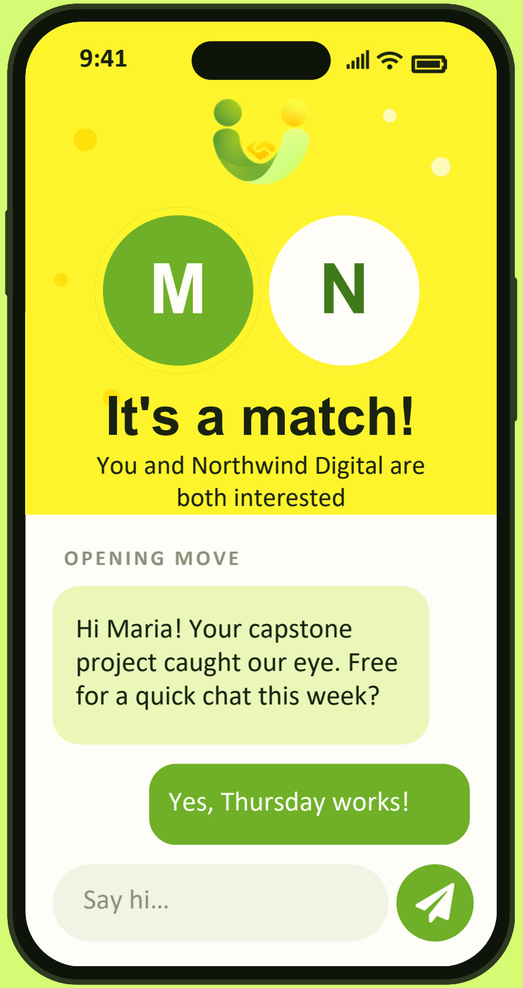

1. **Discover**
   Swipe through recommended vacancies or candidates.

2. **Understand**
   See why it fits and which differences matter.

3. **Connect**
   Chat opens only when both sides say yes.

Where Jumi fits among established platforms

Established platforms

JobStreet

LinkedIn

Kalibrr

Indeed

Bossjob

Already offer large listings, candidate discovery, recruiter tools and, in some cases, recommendations or messaging. Jumi does not claim these functions are new.

A strong base to build on, not to dismiss.

Jumi's combined edge

- **Both sides' preferences**
  assessed together
- **Understandable mismatches**
  explained factor by factor
- **Holistic evidence**
  internships, projects and portfolios count
- **Mutual opt-in**
  before any conversation

The advantage is the combination, and it still has to be proven against real recruitment outcomes.

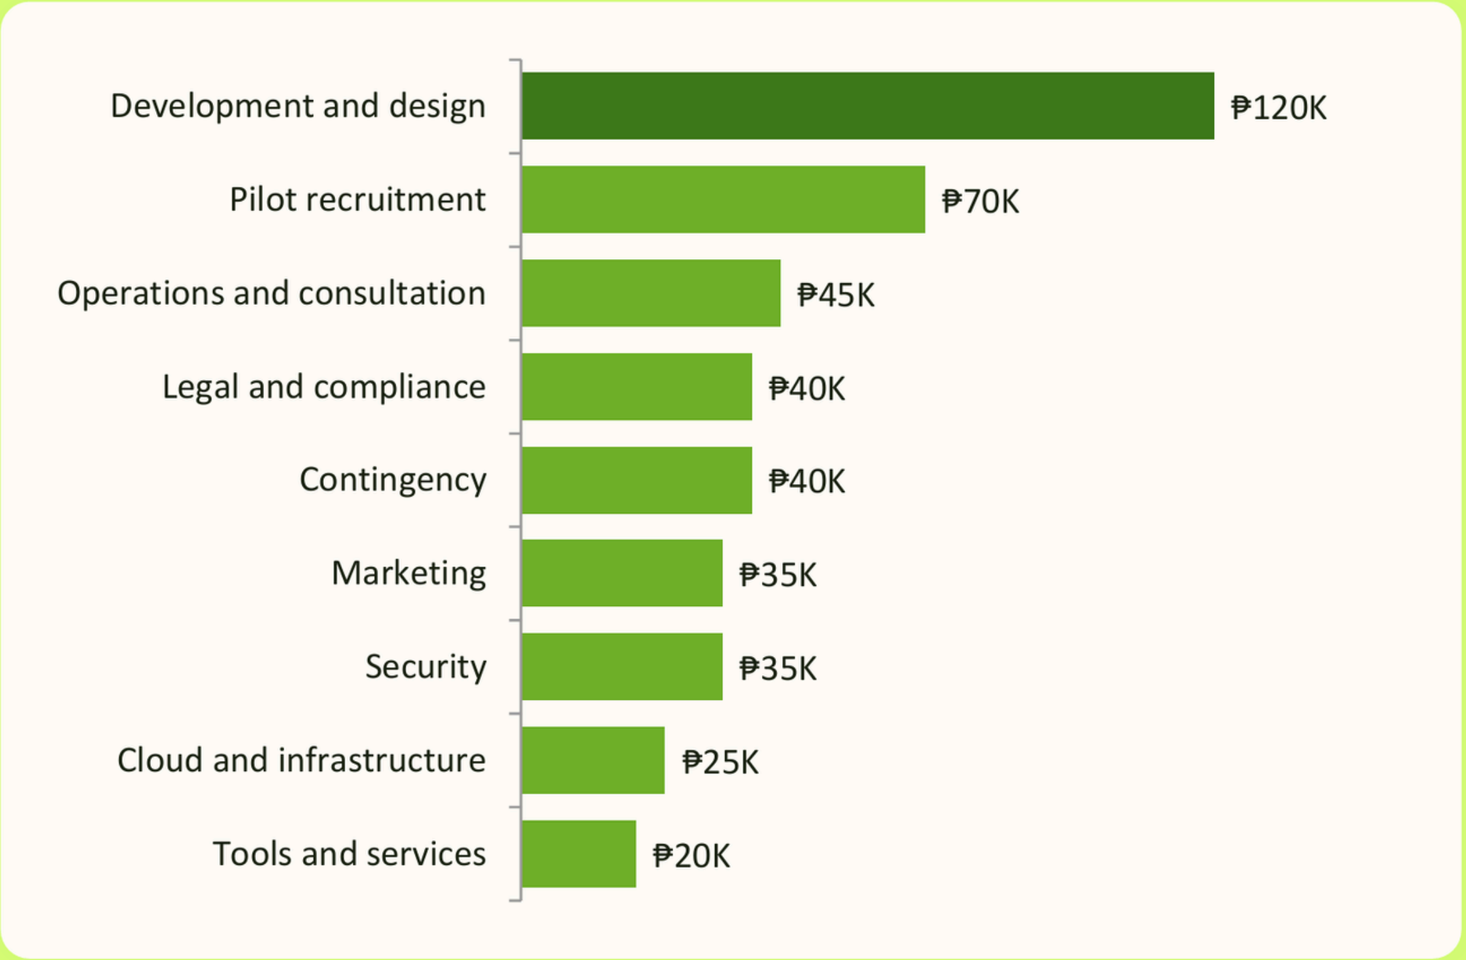

Proposed use of funds: ₱430K for six months

₱430K

to build the MVP and run the pilot

Largest share: development and design, 28%

The team builds the core software. Funds cover specialist support, pilot recruitment, infrastructure and legal compliance.

Progress: from foundation to evidence in six months

Now

Presenting at PSC XI

Pitching at the Philippine Startup Challenge 2026 solidifies the concept and the startup's foundation.

Months 1–3

Build the MVP

Profiles, requirements, recommendations, compatibility logic, swipe matching and private messaging.

Months 4–5

Run the pilot

Onboard a bounded cohort of employers and early-career jobseekers via university partners.

Month 6

Measure and learn

Relevance, clarity of explanations, mutual-match rate, satisfaction and retention.

Next: analytics dashboards, organization accounts and premium features once the core workflow proves useful. Numeric success thresholds will be set before the pilot starts.

THANK YOU

Jumi does not only ask “Are we a match?”
It furthers the picture into “Why might we be?”
